

# REĀN Sites

REAN Sites helps you build and launch business websites quickly and cost-effectively using Drupal on Amazon Web Services (AWS). Our end-to-end managed service provides complete support to develop and maintain Drupal websites.

Our team of experts works on the principles: Performance, Security and Availability. Our comprehensive solution adds agility to your business websites and helps you to connect with your customers in a seamless manner. It is packed with security features to keep your data safe.

## What is REAN Cloud Solutions?

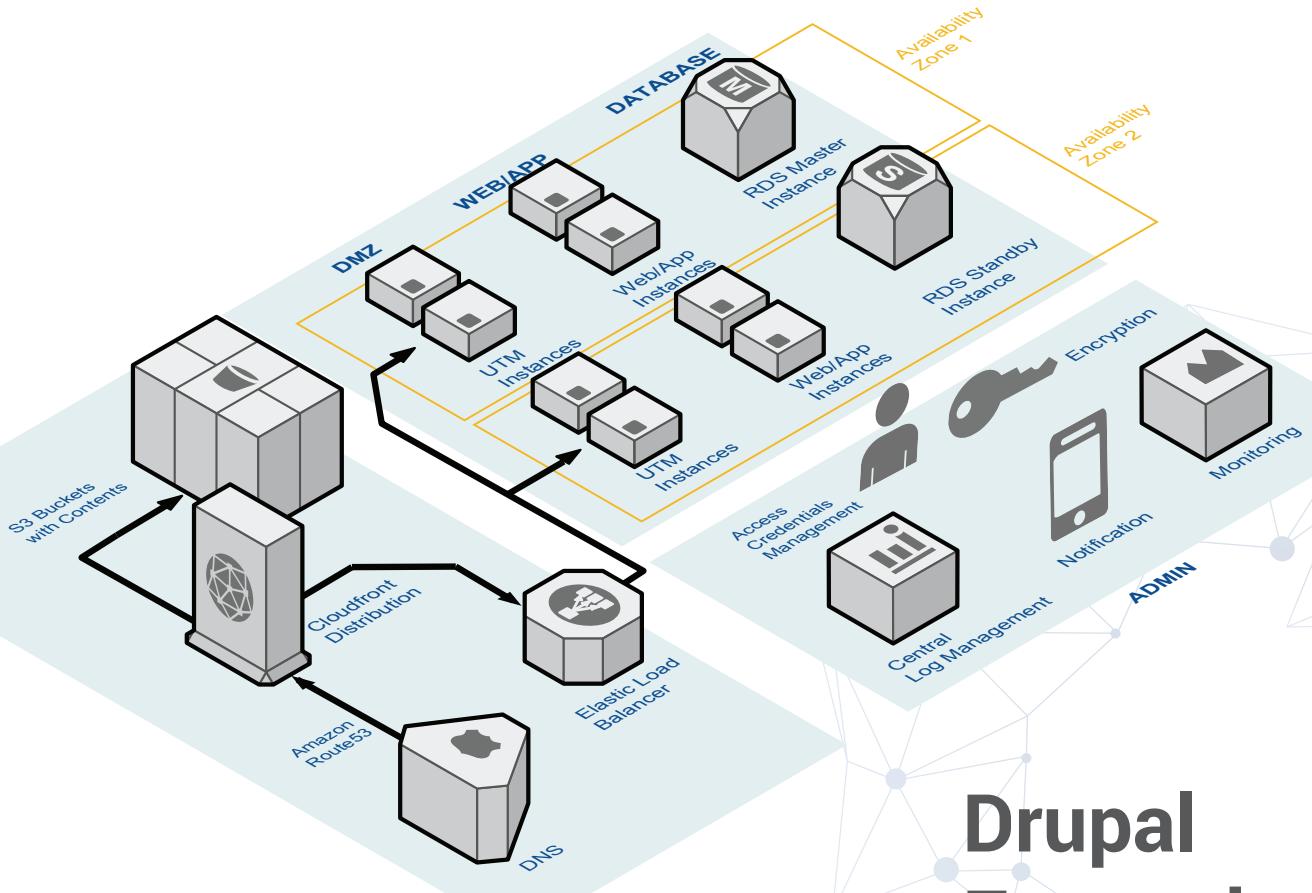

REAN Cloud is a one stop shop for managed solutions to help organizations become agile and productive. Our turnkey solutions empower innovation and reduce time to market at a low cost in a monthly subscription model.

## What value does REAN Cloud Solutions provide?

Our solutions are bundled with advanced security features to help address your compliance needs. Our zero set-up cost delivery model ensures a breakeven from day one with no investments needed for procuring hardware/software or services.

## Who do we plan to cater?

We help established businesses offer a catalog of cloud-based solutions to their stakeholders with improved governance and minimized risk. At the same time, our solutions help start-ups go to market with a complete IT infrastructure without having to establish an in-house IT.

# Drupal Enterprise

## Key Features

We provide an end-to-end service that uses AWS cloud platform to address your website development and maintenance needs with the following key features:

**Flexible and Quick Website Development:** Our experts use the secure AWS cloud platform to help you in developing and launching websites with speed by carefully avoiding any unwanted delays.

**Performance with CloudFront:** The solution's Content Delivery Network ensures an easy way to distribute content to end users with low latency and high data transfer at great speed, thus, designing websites for high performance without compromising on flexibility or data availability. The reduced burden on the servers ensures high efficiencies at very low cost.

**Highly Available and Elastic:** The platform enables high levels of fault tolerance to the websites by seamlessly providing load balancing capacity in response to incoming application traffic. It helps enable Elastic Load Balancing within a single availability zone or across multiple zones for highly consistent website performance in varying traffic conditions.

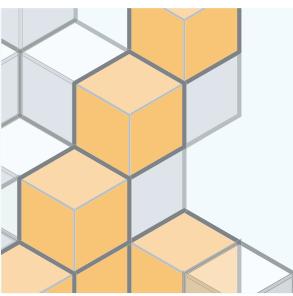

**High Level of Security:** We empower Drupal websites with key security mechanisms to ensure data safety during transactions. AWS platform provides low-cost data storage with high durability and availability. The solution offers high security at no extra cost with storage choices for backup, archiving, and disaster recovery, as well as block, file, and object storage.

## Drupal Bundles

	Developer	Business	Enterprise
Software Tiers	Single Tier	Two Tier	Three Tier
Performance (req/sec)	100	1,000	10,000
Availability	Single-AZ	Multi-AZ	Multi-AZ (Autoscale)
Security	Low	Medium	High
CDN	No	Yes	Yes
Support	8x5	12x5	24x7
Managed Services	Silver	Gold	Platinum

## Our Partner

Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure in the cloud that allows you to quickly innovate, experiment and iterate. This language and operating system agnostic platform offers low, pay-as-you-go pricing with no up-front expenses or long-term commitments. The platform comes with recognized certifications and audits: PCI DSS Level 1, ISO 27001, FISMA Moderate, HIPAA, and SAS 70 Type II.
