### ***Your DR Plan should be a Top Priority***

As a subset of business continuity planning, disaster recovery planning begins with a business impact analysis. The idea behind this analysis is to work out two key metrics:

**A Recovery Time Objective (RTO)**, which is the maximum acceptable length of time that your application can be offline.

**A Recovery Point Objective (RPO)**, which is the maximum acceptable length of time during which data might be lost from your application due to a major incident.

***DR services to accommodate our customers' specific RTO and RPO – measured in minutes or hours, not days.***

DR Architectures we can implement - **Backup & Restore, Pilot Light, Warm Standby, and Multi-Site**

# Why Use the Public Cloud for DR?

## Fast Performance, Secure, No Tape, Compliance, Elasticity, and Partners

### Our Disaster Recovery Services:

- In-depth Analysis of your Current IT Infrastructure, the critical data, and applications.
- Cloud Assessment of the application to run on the Cloud.
- Cloud optimized architecture for the applications.
- Definition of customer risks, timeframes, required performance, and functionality levels supported by SLAs.
- Application Deployment Automation.
- Application Setup / Migration - Installation, Configuration, DB Migration (Lift and Shift, Run Book / DevOps Based).
- Setup Sync Processes and Validate the Setup.
- Create DR Plan and DR Testing.
- Ongoing Management, Security Differentiators, and Solution Support.

**Think of your disaster recovery plan as an insurance policy for your data and business should something out of your control happen.**

### REAN Cloud Differentiators:

- Comprehensive Service Offerings from Business Consulting to Operations Management.
- Our DevOps Accelerator Platform takes away the guess work and hero work out of Enterprise Cloud Transformations.
- Fully baked and ready to be deployed End2End DevOps pipelines accelerating the cloud adoption.
- Compliance & Security DNA embedded across the board; not as an after thought.

### 24x7 Enterprise Managed Services:

- Access Management
- Incident Management
- Data Backup
- Infrastructure Maintenance & Monitoring
- Network Management
- Problem Management
- Service Reporting
- System Monitoring, Patching, and Maintenance
- Support Staff Coverage
